Physical Health & Active Lifestyles

Football

Mr Wilkinson had the privilege of watching four of our year 6 girls represent their district last night in Ashington. They won their two games 1-0.

The team played fantastic and it was brilliant to see both the goals coming from Cestria players.

Physical Health & Active Lifestyles

Cross Country Finals

There were some brilliant individual performances from our other runners and the behaviour of those involved was exceptional.

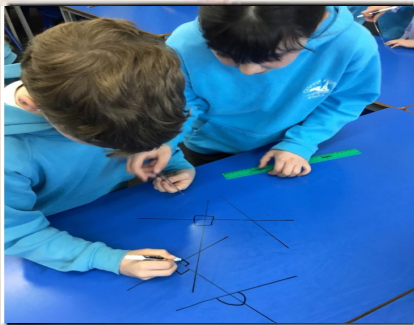

Physical Health & Active Lifestyle

Football Team

Well done to our Year 4 football team who finished 2nd in their first competition last night.

They represented their school extremely well and played some superb football .

Character Education

Marvellous Maths

Identifying angles - right angles, obtuse and acute. Ask us which is which!

CEIAG - Careers Information

Engineering

Kyle from SMD engineering will be helping us with our project. He told us all about engineering as a job and some of the exciting projects he has worked on. Today he brought a remote controlled robot that he had 3D printed and built at home!

CEIAG - Careers Information

Engineering

Crank It Up! This morning Helen from Beamish came to tell us all about the engineering project we are going to be working on this term. We are going to build a crane using KNEX which we will present to the engineers at Beamish before they test it against a set of criteria.

Physical Health & Active Lifestyles

Swimming

So proud of this little lot day coming runners up in the swimming gala. Brilliant talent, commitment and attitude on show today.

Character Education

Reading Shed

Our shed can be found outside the main office. Children are welcome to borrow a book to read from the shed. We would also be happy to accept a book in return, please place these on the top shelf for our year 6 reading helpers to sort into the right box.

Physical Health & Active Lifestyles

Keeping Healthy

We had a workshop with Sian from Chartwells we were finding out how to be 'sugar savvy' by identifying natural and hidden sugars in food and drinks. Then we made healthy fruit skewers!

Science

In Science this term , we are learning about living things and their needs. We have been investigating outside and identifying what each invertebrate needs and using books to find out about the conditions in different micro habitats.

Character Education

Peer to Peer

We welcomed Park View to show us the amazing books which they designed to share with us.

Character Education

Computing

In Computing we are using spread sheets to input data and make calculations.

Character Education

What Can You See?

We have designed and made our very own binoculars. We used them to try and spot birds and worms in the wormery.

Personal, Moral and Cultural Education

Fine Motor Skills

We have been learning all about different types of birds. We created our very own bird feeders to take home and hang outside, showing lots of patience as we carefully threaded each piece. This activity helps to strengthen our fine motor skills.

Character Education

Now Press Play

We tried Now Press Play! We listened to a story through our headphones and followed all of the actions as we moved along. We had so much fun!

Character Education

Spanish

A super fun Spanish lesson with Lingotots.

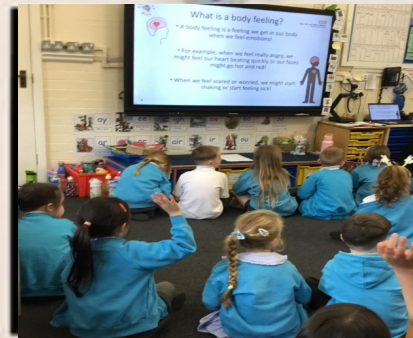

Character Education

Feelings

We talked with Emily about body feelings and how we feel when we are experiencing different emotions.

We created our own feel good flowers .

PHSCE/RSE—Personal, Social

Photography

We have looked at macro photography and were inspired by artist Edward Weston. We took some close up photographs of fruit and vegetables and decided whether they looked best on black or white backgrounds.
